Deviation - Polish machine serving brutal, technical death metal. The band was founded in 2009. A year later, first demo titled "Psycho" appears. After several changes in the vocal position in 2013-2014, the band is focusing on recording their first full album. In the meantime, it has already proven itself in concerts and was enthusiastically received by the underground metal community.

At the turn of 2014/15, the band started cooperation with Mad Lion Records. As a result of signing the contract, in March 2015 it is time for premiere of the debut album "New Generation of Torture" under a banner of the publishing house. The album receives very good reviews both in Poland and abroad.

Unfortunately, like in any machine, sometimes something jams and the cogs don't work properly. As a result of various turmoils, experiments and searches for missing links of the machine, the band finally finishes work on recording next album "Lair Of Suffering" in 2023.

It's time, in a new and already stabilized line-up, to share with the audience what they do best - racy death metal under sign of Suffocation and Cannibal Corpse. Mass annihilation is certain!!!
